

## № 3 CAMP TABLE

Complete table

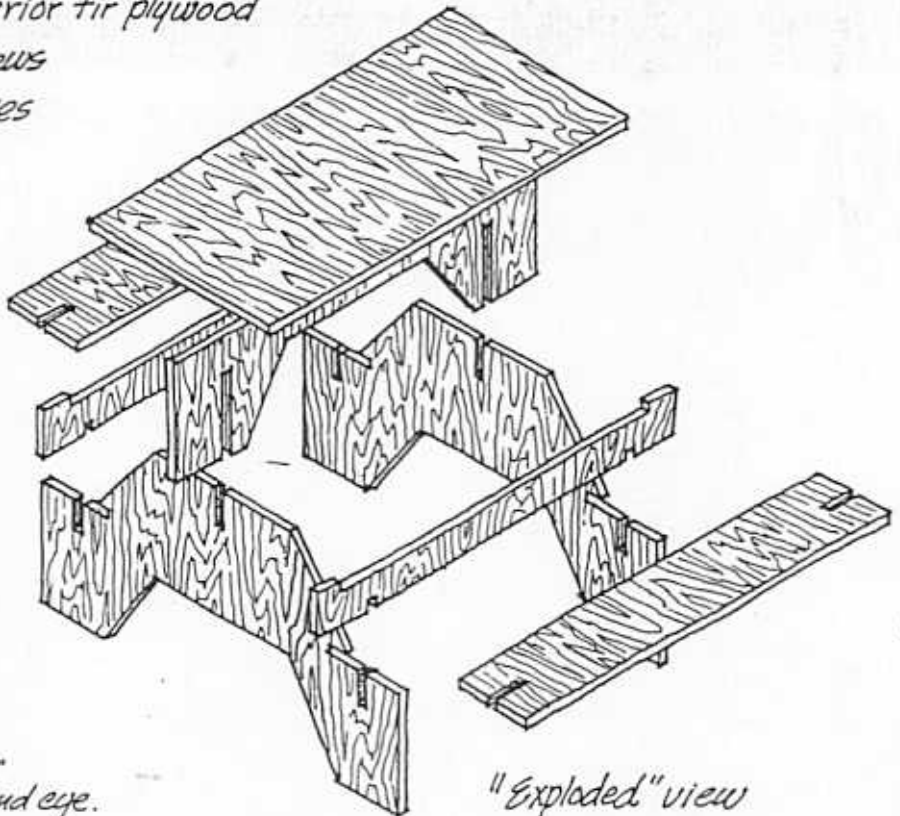

This simple plywood table is a most serviceable item for a variety of camp needs. When used together with a Patrol Kitchen Box (Patrol Sketchbook No 2) there is hardly a better, more portable, setup for cooking and dining.

Easily transported, assembled, and disassembled, this table can be a most welcomed addition to a Patrol's camping gear!

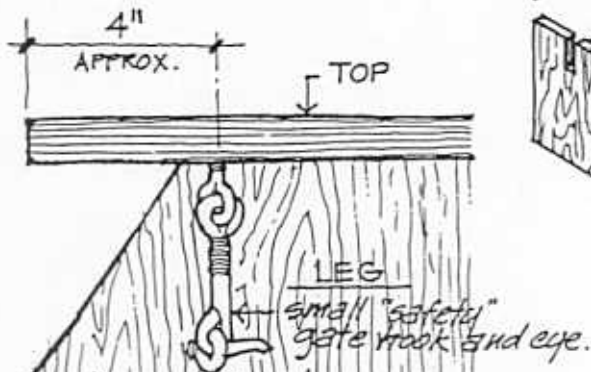

### MATERIALS LIST

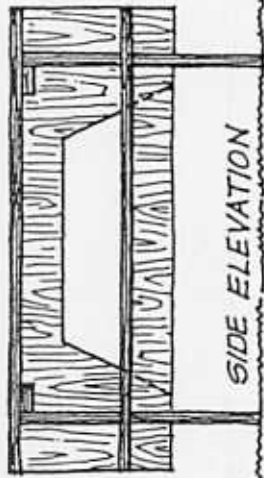

- 1- sheet 3/4" x 4'-0" x 8'-0" exterior fir plywood
- 8- #8 x 1 1/4" flathead wood screws
- 4- safety gate hooks and eyes
- paint, varnish, stain

SIDE ELEVATION

END ELEVATION

Start cutting out pieces starting with the table top then working towards the center support. Layout each piece as you go and not all at once - each saw cut (depending on blade) will remove approximately 1/8" of useable material thereby shortening your plywood as you make each cut. A sharp "plywood blade" is recommended.

indicates scrap pieces

- NOTES:
1. Use 3/4" thick, exterior grade plywood.
  2. Fasten cleats to underside of top with #8 x 1 1/4" long flathead screws.
  3. Cut carefully to insure a good fit.
  4. Sand all edges free of splinters or roughness.
  5. Finish with stain & varnish or paint with exterior enamel.
  6. Finish
